ASWF DEV DAYS 2024

Join us September 25-26, 2024 for our second annual Dev Days to encourage developers (from anywhere, of any experience) to contribute to the open source software that is part of the backbone of the industry. Come spend one day (over the 48 hour period) learning about a project of your choice, benefiting from the mentorship of project leaders, and of course writing code! This event will be fully virtual, and we welcome contributors from all over the world to participate.

Participating Projects   **Participating Developers**

For more information, please join the #devdays channel on the ASWF Slack.
