Minutes

- Action item follow-up (0:05-0:30)
 - Transfer wg-usd wiki content to confluence (Cory O.)
 - Transfer is now complete, including meeting minutes from all sessions, and agendas for upcoming sessions.
 - USD Interest Summary of Threads in Wiki (Alex S.)
 - Next edition coming in August
 - Review other group contributions to the KB (Cory O.)
 - USD Superbuild progress (Carson B.)
 - Follow up next session.
 - Next steps for Gitlab Actions/CI (Cory O.)
 - Cory O: Is there anyone else on the call that may have had discussions with their legal groups about IP ownership issues with the Azure Pipelines and/or GitHub Actions CLA? Images in the repository tested on either of these platforms may be used for promotional purposes by MS/Github.
 - DanielH: Seems like license assignment for most of these projects means that any part of the repository, images included, may be redistributed, and that would supercede any IP issues with the test platform.
 - CoryO: True, USD has screening processes in place to ensure that internal images don't make it into content pushed to GitHub.
- Call for additional topics (0:30-0:40)
 - Shawn D: Is there a place for examples of asset structure in the knowledge base?
 - CoryO: Is the content mainly example assets, or does it include documentation about the structure and choices made?
 - ShawnD: Includes documentation.
 - CoryO: Definitely, please do add this into the wiki, with the full sample assets in the wg-usd github.
 - ShawnD: will follow up to see when this might happen.
 - ChrisR: We may follow up with some content as well (apples example posted on usd-interest).
 - JT: Some progress being made on the Jupyter notebook document.
 - Continuing to add results of research and discussions with other groups.
 - CoryO: Is this something that could be added to the wiki?
 - JT: Once the content solidifies a bit, we can look at adding it to the wiki, but it's still undergoing a lot of change right now.
- Closing/Action Items (0:40-0:50)
 - LF SSO FAQ (Cory O.)
 - Try this if you hit SAML sign-on errors: <https://identity.linuxfoundation.org/user/clear-provider-data>
 - And also check the [LF SSO FAQ](#) (which has more details including the above link).
 - Send email about WGUSD wiki to usd-interest (Cory O.)
 - USD Superbuilds (Carson B.)
 - Jupyter notebook research progress (JT)
